Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 March 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment mailed March 19, 2003.

Claims 1 and 4 were amended rendering claims 1-8 pending.

Claim Rejections – 35 USC § 103(a)

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-8, are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitamura et al. (U.S. 6,465,086).

Kitamura teaches an ink jet recording material having two coatings, where the inner coat may comprise silica (column 2, lines 23-31) where the first and second coatings are formed on the surface (column 3, lines 17-65 and column 6, lines 10-42). Kitamura discloses the coating layer can be formed by conventional coating means, including a gravure means (column 12, lines 22-26 and column 22, lines 20-22) where the coating material comprises silica and the support is a paper sheet (column 13, lines 41-50). Kitamura discloses the invention being of conventional coated paper sheets (column 20, line 22) where paper sheets conventionally comprise fibrous materials. The

Art Unit: 1774

reference discloses drying the coated paper (column 13, lines 20-33 and column 25, lines 20-27) and calendering the material (column 25, lines 28-32). Kitamura does not explicitly disclose that the cited inner coat has the deposition amount as instantly claimed. Such deposition amount is a property which can be easily determined by one of ordinary skill in the art. With regard to the limitation of the deposition amount, absent a showing of unexpected results, it is obvious to modify the conditions of a composition because they are merely the result of routine experimentation. The experimental modification of prior art in order to optimize operation conditions (e.g. deposition amount) fails to render claims patentable in the absence of unexpected results. The aforementioned limitation is optimizable as it directly affects the mechanical strength and durability of the coated paper. As such, it is optimizable. It would have been obvious to one of ordinary skill in the art to make the coated paper with the limitations of the deposition amount of the inner coat since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. *In re Boesch*, 617 USPQ 215 (CCPA 1980).

Response to Arguments

4. Applicant's arguments of rejection made under 35 U.S.C. 102(b) as being anticipated by Suzuki et al. (U.S. 4,298,652) are moot based on grounds of new rejection. Applicant's arguments of rejection made under 35 U.S.C. 103(a) as being

Art Unit: 1774

unpatentable over Suzuki et al. (U.S. 4,298,652) in view of Li (U.S. 6,183,844) are moot based on grounds of new rejection.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
